Art Unit: 2875

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30 are, drawn to a method of manufacturing an image display apparatus, classified in class 445, subclass 25.
- II. Claims 31-46 are, drawn to an apparatus for manufacturing an image display apparatus, classified in class 445, subclass 73.

The inventions are distinct, each from the other because of the following reasons:

Inventions a method of manufacturing an image display apparatus and an apparatus for manufacturing an image display apparatus are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the Applicant claims a method of manufacturing a image display apparatus with the claimed apparatus with different chambers with each different atmospheric pressure to accomplish the task. However, the image display apparatus may be formed using the same method in one single chamber by adjusting the atmospheric pressure of the chamber in order to accommodate the different steps in the forming the image display apparatus. Also, the method of manufacturing a image display apparatus and the an apparatus for manufacturing an image display apparatus are distinct invention as acquired a separate status in the art as shown by their different classification, restriction for examiner purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2875

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventor is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
